## EDUCATION

### BS Software Engineering

National Textile University, Faisalabad

#### Projects

- Virtual Tourist Guide. (Mobile Application using kotlin)
- QUIZBING (Web App using PHP)

## PROJECTS

### Book Corner

- Book Corner is a full stack MERN application, an online bookstore where users can view books, sign up, and sign in to add/remove books to their Wishlist, and add/remove books to their cart. It also includes a protected admin dashboard where admins can view books, and add, edit and remove a book, and view orders (UI) and customers (UI).

### E-Commerce Shop

- This app is built using Node.js, Express, MongoDB, and the EJS templating engine. It features a user who can perform CRUD operations on his products. The app includes user authentication with login, signup, and password recovery options. Logged-in users can add products to their cart, create orders, and complete purchases.

### Post Management API

- This API, developed with Node.js, Express, and MongoDB, allows only authenticated users to perform all CRUD operations on their posts.

### Mad Libs Word

- A simple web app created using HTML, CSS, and JavaScript that offers unique stories. Each story comes with a form where users can input words, which are then dynamically inserted into the story to create a customized and humorous narrative.

## WORK EXPERIENCE

### SQA Engineer

Sabre Corporation

10/2022 - 03/2024

Lahore
